CROSS CUTTING CONCEPT SCAVENGER HUNT

Directions: Select 2 cross cutting concepts. In the boxes below, write the cross cutting concept you selected and identify as many examples as you can of the cross cutting concept in the activity.

Cross Cutting Concepts

Cause and Effect... *one event/ stimulus triggers another event/ consequence/ outcome.*

Systems and Systems Models... *parts together make a system and a system will perform a task.*

Patterns ... *regularly occurring shapes or structures, in repeating events and relationships, etc.*

Energy and Matter... *energy and matter cannot be created or destroyed; it cycles and changes form.*

Structure and Function... *the shape and/or design of things, systems, body parts, etc. is specific to or dictates its function or jobs.*

Stability and Change... *the natural world in a constant flux between things staying the same (stability) and things changing.*

Scale, Proportion & Quantity... *concepts and systems can be viewed in terms of scale and magnitude, and in relation to one another.*
